

AI-Native mPaaS — Exhaustive Screen Inventory (12 Standalone Apps)

Each app is fully standalone — its own RBAC, auth, multilingual + RTL, AI co-pilot, and public bot widget. No shared SSO.

How to read	Scaffolding every app must have on its own (auth/OTP/MFA, RBAC, settings, branding, localisation/RTL, AI co-pilot, public bot widget admin, billing, audit, popups, error states). Replicated INSIDE each of the 12 apps.
01_Common_Per_App	Module-specific screens only — what makes each app unique. Super Admin master data, Client Admin operations, End User self-service, module popups + bot flows.
02 ... 13	
Persona colour legend	
Super Admin	Platform operator — master data, multi-tenant control, models, billing plans.
Client Admin	Tenant admin / business user — configures the app for their organisation.
End User	The persona the module serves (employee / vendor / customer / agent / candidate / field rep / community member / subscriber / requestor).
Public / Bot	Unauthenticated visitor reaching the embedded bot widget or public surfaces.
Shared	Used by all personas (auth, search, error states, etc.).
Type values	
Page	Full route / screen
Modal	Overlay dialog requiring action
Drawer / Side Panel	Slide-in panel that doesn't block primary screen
Wizard Step	Step inside a multi-step flow
Intermediate	Loading / progress / processing / verifying state
OTP	One-time-password / MFA challenge step
Confirmation	Destructive or irreversible confirm (often type-to-confirm)
Toast / Banner	Non-blocking notification
Empty State	Zero-data / no-permission state
Widget	Embeddable / floating element

	Mobile-specific variant (touch + offline)
Mobile	
Apps in this inventory	HR self-service: onboarding, attendance, leave, payroll, performance, LMS, expenses, exits.
02_EmployeeSelfService	AI chatbot + agent desk for support across web/WhatsApp/SMS/email/voice.
03_CustomerSelfService	Capture, enrich, score, route, sequence; SDR + AE workbench; ABM.
04_LeadGeneration	Vendor onboarding, KYB, compliance, portal, RFx, performance.
05_VendorSelfService	ITSM/ESM — incidents, problems, changes, CMDB, runbooks, requestor + agent.
06_TicketingSystem	PR-to-Pay: requisitions, RFx, POs, GRN, 3-way match, invoices, payments.
07_Procurement	Surveys, polls, NPS/CSAT/CES, conversational surveys, panel + close-the-loop.
08_SurveyPoll	Beat/route, geo check-in, orders, audits, collections, image-AI, offline mobile.
09_FieldForce	Multi-community: spaces, moderation, gamification, events, UGC.
10_Community	Inbound/outbound voice, IVR, voicebot, dialer, WFM, QA, conversation intel.
11_CallCenter	Omnichannel journeys, email/SMS/WhatsApp/push, loyalty, CDP, attribution.
12_Marketing	ATS + sourcing + AI screening + interviewing + offer + pre-boarding.
13_HiringTalent	
Cross-cutting reminders	Every screen supports per-user language switch AND RTL mirroring. Localisation tooling, RTL preview, AI auto-translate in Common Per-App.
RTL / Localisation	Every app embeds a co-pilot (panel + slash + voice). Admin co-pilot screens in Common Per-App; module-specific actions per app.
AI Co-pilot	Every app ships an embeddable bot for public visitors. Admin config in Common Per-App; conversational flows per app.
Public Bot Widget
